IMPACT

Shingrix Selling Model

IMPACT: The EM Shingrix Selling Model

PREPARE

ANALYSE

Dynamics are different when Selling Vaccines

Pharma

- A clear patient profile
- Clear symptoms
- Diagnosis process
- Prescribe a medicine fit to these symptoms
- Clear patient profile with clear symptoms
- **key selling message**

Vaccines

- Healthy subjects
- No symptoms
- No diagnosis process
- No immediate treatment required,
- HCP not aware or interested to start this process

➤ What are the benefits for Patients , HCP and GSK sales from taking this different approach

What is the Difference between Pharma Selling Model and IMPACT

Pharma GSO model

EM IMPACT GSO model

COCO/OPEN THE SALES CALL

- Link to the last call
- Verbalize COCO: Do differently + patient profile + instead of competition

Engage

- Link to the last Call
- Create Interest and share value
- **Co-Identify patient profile**

SOURCE OF BUSINESS

Uncover opportunities

- Ask insightful questions to uncover opportunity and challenge the current status quo

Delivery key messages

- Provide compelling solution
- Handle objections – APACT model

Create opportunity

Use insightful questions to create the opportunity: the HCP should realize the need and **urgency of vaccinating** the specific patient identified

Influence

- Link Key Selling Messages to agreed patient & Handle objections
- **Align on the Moment to start Shingrix discussion with the patient “add to the doctor Routine”**

GSO

- Close with commitment
- The actions that will be done by the HCP to start/increase prescription in a new patient profile or influence other

Impacto GSO

1+1

One new experience
+
One Insightful Question

New patient profile

Influence others

Standardizing the prescription

Action/Activity to enhance disease awareness

New strategy to guarantee adherence

Product availability

The IMPACT's Essence

Customer centricity:

Focus on the HCP's reality, needs and perspective aiming at implement a patient focused selling to each HCP.

Tailored storytelling:

Drive a truly customized conversation, creating the specific opportunity to each HCP and involving him in an emotional selling.

Key selling messages must be used to bring confidence to start the new experience with Shingrix.

How to do it:

Vaccination is not a reality for most of our Customers ! We have the responsibility to help them in HOW to do it.

How to have the conversation with their patients, how to prescribe Shingrix, at what moment during the consultation.

What is new in **IMPACT GSO**?

GSO

IMPACT GSO

PREPARE

Prepare in GSO

- Physician profile analysis and Physician/Patient Insights;
- Define COCO: Do differently + patient profile + instead of competition
- Prepare challenges/motivations

Prepare in IMPACT

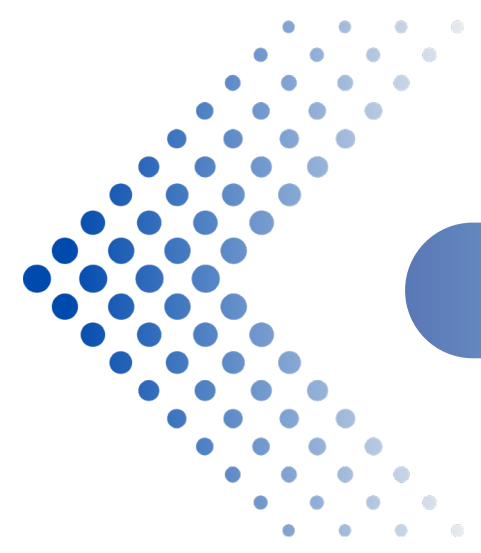

- Link to the last call
- Commercial objective & Co-Identify Patient Profile
- Align Vaccination Moment
- New Experience with Shingrix

Post cal in GSO

- Did I verbalize the COCO?
- Did I uncover the opportunities?
- Did I achieve GSO?
- Plan next steps – What is the COCO for the next call?

Analysis in IMPACT

- Assess the call outcome:
- Did I achieve GSO, having a clear commitment of the HCP with a new experience with Shingrix? Why?
 - What's my next call commercial objective?

Coaching Template

Detailed Coaching of IMPACT Selling model

Call Performance		1	2	3	4	5
COCO: # of calls where all 4 points completely observed - Link to the last call - Planned Target Patient to Co-Identify with HCP - Planned Vaccination Moments to discuss HCP - Panned 1 Plus 1 [New Vaccination Experience Plus 1 insightful Question to confirm agreement]		1 INSUFFICIENT FLSL rarely observed call objectives covering all the 4 points in less than 20% of the observed calls (1-2 COCO observed out of 10 call)	2 PARTLY MEET THE EXPECTATIONS FLSL observed call objectives covering all the 4 points in up to 40% of the observed calls (3 or 4 COCO observed out of 10 call)	3 MEET THE EXPECTATIONS FLSL observed call objectives covering all the 4 points in up to 60% of the observed calls [5-6 COCO observed out of 10)	4 ABOVE THE EXPECTATIONS FLSL observed call objectives covering all the 4 points in up to 80% of the observed calls. Objectives set to match HCP RACE segmentation (7-8 COCO observed out of 10)	5 AT ROLE MODEL LEVEL FLSL observed call objectives covering all the 4 points in up to 100% of the observed calls. Objectives set to match HCP RACE segmentation. call objective is supported with different channels (pre or post the call). (9-10 COCO observed out of 10)
SOB: The following steps has been implemented sufficiently Engage - Rep Create interest and share Vx Value - Rep Co-identified Patient Profile for Vaccine with HCP Create Opportunity using powerful insightful questions - HCP Prevention Approach / protocol understood - Explored/understood HCP barriers to Start Vaccination - Was able to create need /opportunity to prevent shingles Influence Co-identified Patient focused thoroughly and Emotive Selling is used when needed Co-Create Vaccination moment with HCP - Objections handled Key selling message aligned with the identified patient / marketing strategy - Discussing not telling (share of voice for the customer 40 to 50%)		1 INSUFFICIENT (1-2 SOB observed out of 10 call) 10%-20% of the questions that need to be asked have been asked)	2 PARTLY MEET THE EXPECTATIONS (3 or 4 SOB observed out of 10 call) 30%-40% of the questions that need to be asked have been asked	3 MEET THE EXPECTATIONS (5-6 SOB observed out of 10) 4 (50%-60% of the questions that need to be asked have been asked)	4 ABOVE THE EXPECTATIONS (7-8 SOB observed out of 10) (70%-80% of the questions that need to be asked have been asked)	5 AT ROLE MODEL LEVEL (9-10 SOB observed out of 10) (90%-100% of the questions that need to be asked have been asked)
IMPACT GSO: [1 Plus 1] Calls where HCP has change in the behaviour and commits to vaccination (1 New experience agreed + 1 insightful question asked to confirm agreement) Succeed to Move HCP to Vaccinator , or If Vaccinator , agree to use with new profile or influence other e.g. of new experience - New PT Profile agreed - Standardize Vx. prescription agreed - Agreed Activity to increase Disease awareness - Agreed to Make Vx. available in the clinic - Agreed a New approach to convince PTs - Agreed New approach to guarantee adhesion / compliance for 2nd dose - Agreed action/activity to maximise prescription [Zoster week / day]		1 INSUFFICIENT (0 GSO observed out of 10 call) Less than 10% of the observed calls	2 PARTLY MEET THE EXPECTATIONS (1 GSO observed out of 10 call) Between 10%-19% of the observed calls	3 MEET THE EXPECTATIONS (2-3 GSO observed out of 10) Between 20%-30% of the observed calls	4 ABOVE THE EXPECTATIONS (4-5 GSO observed out of 10) "Between 31% -59% of the observed calls"	5 AT ROLE MODEL LEVEL (6 or more GSO observed out of 10) 60% or more of the observed calls
Analyze sales call - Did I achieve GSO, having a clear commitment of the HCP with a new experience with Shingrix? WHY? - What is my next call Objective		1 INSUFFICIENT (0 GSO observed out of 10 call)	2 PARTLY MEET THE EXPECTATIONS (1 GSO observed out of 10 call)	3 MEET THE EXPECTATIONS (2-3 GSO observed out of 10)	4 ABOVE THE EXPECTATIONS (4-5 GSO observed out of 10)	5 AT ROLE MODEL LEVEL (6 or more GSO observed out of 10)
